## How are stopped-out positions handled?

Dan Rikkou - 2026-02-27 - [Comments \(0\)](#) - [Trading Conditions](#)

When your account equity falls below the required margin level, positions will be **automatically closed (stopped out)** to prevent further losses.

If your **margin level falls below 20%**, positions will be closed **starting with the largest losing position first**, until the margin level recovers to an acceptable level.

This process helps protect your account from entering a negative balance and ensures that risk is managed in accordance with our trading conditions.

*If you have questions about margin requirements or stop-out levels, please contact your Account Manager or our Support Team via Live Chat or email at [support@infinox.com](mailto:support@infinox.com)*
